**DECLARATION OF RAJINDRA ANEJA  
UNDER 37 C.F.R. § 1.131**

**I, RAJINDRA ANEJA, HEREBY DECLARE AS FOLLOWS:**

1. I am the sole inventor of the subject matter disclosed and claimed in the captioned patent application.
2. I am the sole inventor of the subject matter disclosed and claimed in U.S. Application Serial No. 08/872,222, to which the present application claims priority.

09626396-040304

3. I am a citizen of the United States and reside in Ithaca in the state of New York.
4. I am Director of Nutrimed Biotech, the assignee of the captioned patent application.
5. I have reviewed each of the Official Actions issued by the U.S. Patent and Trademark Office (P.T.O.) in U.S. Application Serial No. 08/872,222. I disagree with the rejections that remained at the conclusion of examination of U.S. Application Serial No. 08/872,222.
6. I understand that the claims that did not progress to allowance in U.S. Application Serial No. 08/872,222 are being filed in the captioned patent application and that any rejections remaining at the conclusion of examination of U.S. Application Serial No. 08/872,222 should be addressed in this application.
7. I understand that in an Advisory Action in U.S. Application Serial No. 08/872,222 dated October 12, 2000, the P.T.O. raised the possibility that one or more prior art-based rejections could be entered based upon four newly-cited references.
8. The four references attached to the Advisory Action are: Thum *et al.*, cited as a 1997 ACS reference to an original article by Thum *et al.* published as *Tetrahedron Lett.*, 37(50):9017-9020, 1996; Wang and Chen, cited as a 1996 ACS reference to an original article by Wang and Chen published as *J. Org. Chem.*, 61(17):5905-5910, 1996; Reddy *et al.*, cited as a 1996 ACS reference to an original article by Reddy *et al.* published as *J. Org. Chem.*, 60(11): 3385-3390,

1995; and Bruzik and Kubiak, cited as a 1995 ACS reference to an original article by Bruzik and Kubiak published as *Tetrahedron Lett.*, 36(14): 2415-2418, 1995.

9. I do not believe that the references by Wang and Chen, Reddy *et al.* or Bruzik and Kubiak disclose the phosphoinositide analogues of the present invention, which are based on phosphatidylinositolphosphate, wherein the 2-OH is rendered non-nucleophilic by derivatization or replacement or wherein a reporter group or conjugand is incorporated in the fatty acyl or inositol residue.

10. The cited Thum *et al.* article was attached to the Advisory Action as a 1997 ACS reference to an original article by Thum *et al.* published in the journal *Tetrahedron Lett.*, in 1996. The original Thum *et al.* reference was published in December 1996 (**Exhibit A**).

11. The cited Wang and Chen article was attached to the Advisory Action as a 1996 ACS reference to an original article by Wang and Chen published in the journal *J. Org. Chem.*, in 1996. The original Wang and Chen reference was published in August 1996 (**Exhibit B**).

12. I am providing the present declaration and attached documentary evidence to demonstrate that the invention disclosed and claimed in U.S. Application Serial No. 08/872,222 and in the captioned patent application was made in the United States prior to December 1996 and prior to August 1996. That is, that the invention disclosed and claimed in my applications was made in the United States prior to the publication date of each of the original articles cited by the P.T.O. as Thum *et al.*, 1996 and Wang and Chen, 1996.

13. Evidence of the fact that the invention of U.S. Application Serial No. 08/872,222 and the captioned patent application was made in the United States prior to August 1996, the earlier date of the two cited references, is already available to the P.T.O.

14. This evidence available to the P.T.O. takes the form of provisional application Serial No. 60/019,651, to which U.S. Application Serial No. 08/872,222 and the captioned patent application each claim priority. Provisional application Serial No. 60/019,651 was filed with the U.S. Patent and Trademark Office on June 11, 1996, *i.e.*, prior to the August 1996 date of the earlier of the two cited references. The studies embodied in provisional application Serial No. 60/019,651 were conducted in the United States.

15. Based upon the foregoing evidence, I declare that the invention of U.S. Application Serial No. 08/872,222 and the captioned patent application was made in the United States prior to the August 1996 publication date of the original article by Wang and Chen, 1996, the earlier of the foregoing references cited by the P.T.O.

16. I hereby declare that all statements made herein of my knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

Abstract: The 3-mono-, 3,4-bis-, and 3,4,5-trisphosphates of L-alpha-phosphatidyl-D-myo-inositol have been synthesized in their optically active forms from the two enantiomers of 1,2:5,6-di-O-cyclohexylidenemyo-inositol. These chiral precursors were prepared by a facile biocatalytic resolution, in which the 8-butyryl ester of the racemic compound was subjected to enantioselective hydrolysis by porcine pancreatic lipase in a biphasic system. The overall yield from individual chiral precursors ranged from 32% for the 3,4,5-trisphosphate to 39% for the monophosphate.

ASSIGNMENT

FOR GOOD AND VALUABLE CONSIDERATION, the receipt, sufficiency and adequacy of which are hereby acknowledged, the undersigned, does hereby:

SELL, ASSIGN AND TRANSFER to NUTRIMED BIOTECH (the "Assignee"), having a place of business at Cornell University Research Park, 270-276 Langmuir Laboratory, Ithaca, New York 14850, the entire right, title and interest for the United States and all foreign countries in and to any and all improvements which are disclosed in the application for United States Letters Patent, Serial No. 08/872,222 which has been filed on June 10, 1997 and is entitled "MOLECULAR PROBES AND MODULATORS FOR PI-PLC AND PI 3-KINASE", such application and all divisional, continuing, substitute, renewal, reissue and all other applications for patent which have been or shall be filed in the United States and all foreign countries on any of such improvements; all original and reissued patents which have been or shall be issued in the United States and all foreign countries on such improvements; and specifically including the right to file foreign applications under the provisions of any convention or treaty and claim priority based on such application in the United States;

AUTHORIZE AND REQUEST the issuing authority to issue any and all United States and foreign patents granted on such improvements to the Assignee;

WARRANT AND COVENANT that no assignment, grant, mortgage, license or other agreement affecting the rights and property herein conveyed has been or will be made to others by the undersigned, and that the full right to convey the same as herein expressed is possessed by the undersigned;

COVENANT, when requested and at the expense of the Assignee, to carry out in good faith the intent and purpose of this assignment, the undersigned will execute all divisional, continuing, substitute, renewal, reissue, and all other patent applications on any and all such improvements; execute all rightful oaths, declarations, assignments, powers of attorney and other papers; communicate to the Assignee all facts known to the undersigned relating to such improvements and the history thereof; and generally do everything possible which the Assignee shall consider desirable for vesting title to such improvements in the Assignee, and for securing, maintaining and enforcing proper patent protection for such improvements;

TO BE BINDING on the heirs, assigns, representatives and successors of the undersigned and extend to the successors, assigns and nominees of the Assignee.
